EnerSys Corporation Named to the Aggie 100 List

HOUSTON, January 17, 2008 –EnerSys Corporation, a Houston-based upstream energy company specializing in the implementation of SCADA, field automation and custody transfer measurement for oil and gas operations, was recently named to the “Aggie 100” list.

The Aggie 100 identifies, recognizes and celebrates the 100 fastest growing Aggie-owned or Aggie-led businesses in the world. The Aggie 100 not only celebrates their success, it also provides a forum to pass lessons to the next generation of Aggie entrepreneurs.

From more than 700 nominees, the 100 companies with the highest compound annual revenue growth from 2004 to 2006 were awarded and recognized at a luncheon on Texas A&M University campus. The honorees were also featured in the November 2007 issue of *Texas Aggie*, a magazine published by The Association of Former Students at Texas A&M University.

“This award recognizes growth, success, and entrepreneurship, all three of which I am proud to have associated with EnerSys. Being named to this list is a great accomplishment for EnerSys, and its highly committed employees. I am truly honored to be chosen as an Aggie 100 Honoree for 2007, and proud to be named alongside this list of distinguished former student leaders,” said Russel Treat, President and Founder of EnerSys (and class of 1980 and former band member).

Award criteria include company size and longevity, leadership, and company character evaluations. For more information on criteria, and to view the complete 2007 Aggie 100 list, visit www.aggie100.com.

About EnerSys Corp.

EnerSys Corporation works with oil and gas companies and specializes in the implementation of SCADA, field automation and custody transfer measurement for oil and gas operations. By providing systems engineering service in all areas of production, gathering, transmission, storage, plant, distribution and use, EnerSys helps companies such as Williams, El Paso, Anadarko and Devon to determine and implement the best possible solutions for their operations. Visit www.enersyscorp.com to learn more.
